

Project Design Phase

Solution Architecture

Date	3 October 2026
Team ID	SWTID-2026-4145
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	

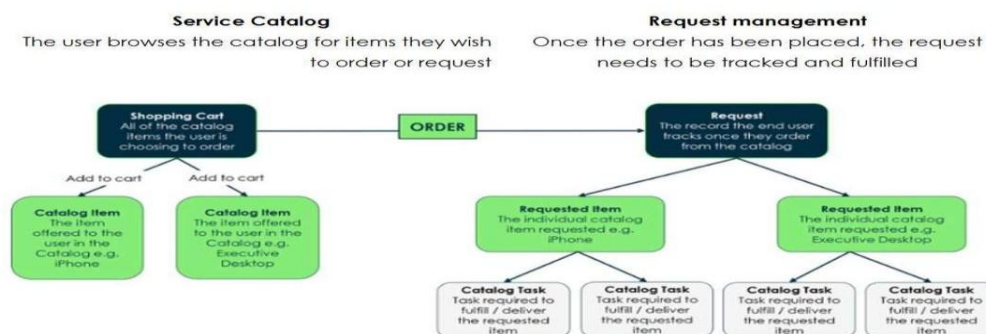

Solution Architecture

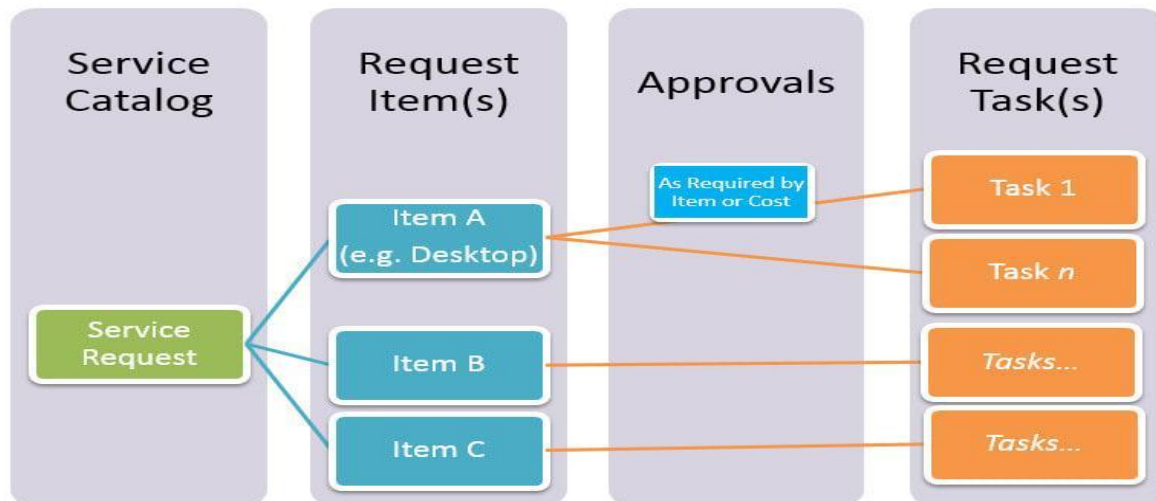

The proposed architecture shows how a **Standard Laptop request** moves through the ServiceNow platform. The employee selects the Standard Laptop catalog item, submits the request, and ServiceNow creates the Request and Requested Item (RITM). The Service Catalog trigger then starts the **Standard Laptop Task Flow Designer** flow, which automatically creates a Catalog Task and assigns it to the **Hardware** group for fulfillment.
